To Whom It May Concern:

I write to highly recommended Mr. Oliver Odusanya for special admission into a specialized PhD/DBA degree program.

I first met Oliver in May 2022 through his inviting me to provide insight into the feasibility of his business venture involving the use of artificial intelligence to reduce worldwide oil consumption. I was immediately impressed with his creativity, intellect, business acumen, and fearlessness. His budding enterprise is based on an innovative, transformative, and revolutionary idea that requires a broad multidisciplinary team of experts to develop it into a burgeoning company that can be profitable yet simultaneously help the world reduce greenhouse gas emissions. In this context, I suggested the names of several prominent SIO scientists who could potentially comprise that team and he independently contacted them about joining his endeavor.

Although Oliver does not have an undergraduate degree, he personifies the rare "special case". Considering Oliver has already established a novel idea, a standard PhD/DBA would not be suitable for his situation. A customized PhD/DBA program would be more suitable for what he is trying to achieve.

In summary, Oliver has the unique combination of the ability to think big, the ambition to excel, and the tenacious fervor to succeed in an academic program. His presence will be beneficial both to you, locally, and to society, globally, through the acceleration of his business goal of sustainability by greenhouse gas reductions.

Yours sincerely,
